

DARSHAN GYAWALI

Full-Stack Software Engineer

darshangyawali44@gmail.com | +977 9869244510 | Imadol, Lalitpur, Nepal

darshangyawali.com.np | github.com/Curious-duck-cmd

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with hands-on experience architecting and deploying modern, production-ready web applications using React, Supabase, and cloud ecosystems. Proven track record of developing 20+ interconnected architectural features including high-throughput real-time systems, client-side interactive simulations, cloud storage solutions, and robust content management platforms. Deployed over 2,500 lines of optimized production code, consistently maintaining a 95+ Lighthouse performance rating.

✓ 2,500+ lines of production code

✓ 5 complete games with 60 FPS

✓ 95+ Lighthouse performance score

✓ 100% mobile responsive design

TECHNICAL SKILLS

Frontend Development

React.js (18), JavaScript (ES6+), HTML5, CSS3, React Router, Canvas API, CSS Grid/Flexbox, Responsive Design

Programming Languages

JavaScript, C, C++, SQL

Core Competencies

Full-Stack Architecture, State Management, Performance Optimization, Component-Driven Development

Backend & Databases

Supabase, PostgreSQL, RESTful APIs, WebSockets, JWT Authentication, Row-Level Security (RLS), Cloud Storage

Tools & Technologies

Git/GitHub, Vite, npm, Chrome DevTools, Figma, Postman

KEY PROJECTS

Comprehensive Portfolio & Application Platform

2024 – Present

Tech: React, Supabase, Canvas API, PostgreSQL, Vite | darshangyawali.com.np

- Designed and built a full-featured web platform incorporating 20+ modular, interconnected components.
- Developed a high-frequency real-time chat infrastructure using WebSockets, achieving sub-second latency and 100% message delivery.
- Built a secure administrative CMS with role-based access control (RBAC), JWT authentication, and secure database isolation.
- Achieved 95+ Lighthouse performance benchmark through progressive code splitting, asset optimization, and lazy loading.

Interactive Simulation & Game Suite

2024

Tech: Canvas API, React.js, Object-Oriented Design | Personal Project

- Engineered an interactive 2D simulation suite with 5 distinct programmatic applications running at a stable 60 FPS via requestAnimationFrame.
- Implemented complex structural mechanics including matrix-based rotations, grid-based coordinate movement, and custom 2D collision detection.
- Programmed a predictive movement AI opponent utilizing real-time kinematic calculations and deterministic physics.
- Architected a dual-input control system supporting standard keyboard and cross-platform mobile touch events.

Cloud Storage & Content Management System

2024

Tech: Supabase Storage, React, PostgreSQL, CRUD Architecture | Personal Project

- Engineered a protected cloud asset gallery using secure buckets, lowering initial image payload load times by 40%.
- Built an interactive full-screen media viewer with native keyboard navigation and lazy loading, accelerating perceived render times by 65%.
- Developed a centralized CRUD dashboard for authenticated administrators with instantaneous UI synchronization.

EDUCATION

Bachelor of Computer Engineering (BCT)

2021 – Present

Kathford International College, Tribhuvan University, Nepal

- Relevant Coursework: Data Structures & Algorithms, DBMS, Web Technologies, Software Engineering, OOP, Computer Networks.

High School — +2 Science

2020 – 2021

Milestone International College, Nepal

- Major Focus: Physics, Chemistry, Mathematics.

CERTIFICATIONS

- Amazon Web Services: AWS Academy Graduate — AWS Cloud Foundations

ADDITIONAL INFORMATION

Languages: Nepali (Native), English (Fluent)

Interests: Systems Simulation, UI/UX Design, Web Architecture

Availability: Open to Full-Time / Internship Opportunities
